The programme will work on

Practice-oriented education: the professional field is a very important partner with whom we already work very closely. However, we want to expand this even further in the future by embedding it in the program through extra projects, seminars,

Future-oriented education: by using digital tools in our education in the right way and by responding quickly to developments in the professional field, we want to offer an up-to-date program.

Inclusive education: we try as much as possible to develop a feasible study trajectory together with the student(s), we will launch new actions in 2022-2023.
